DISCUSSION

As explained by the Examiner in the Notice to Submit Response issued by the Korean Intellectual Property Office on 27 February 2003, it was the opinion of the Korean Intellectual Property Office that the invention defined by claims 1 and 2 of the Korean application were directed "to a signal processor having switching elements that displayed the PC output signal and the TV/video signal or displayed these signal using a picture-in-picture (PIP) function," could have easily been derived from Korean laid-open utility model publication No. 1998-15902.
